

Digital VoIP Gateway

Dinstar MTG1000 Low Density E1/T1 Digital VoIP Gateway

MTG1000 series E1/T1 Digital VoIP Gateways with 1/2 ports E1/T1 is a compact and expense trunk gateway designed to interconnect between PSTN and IP networks. With powerful hardware design, MTG1000 series has comprehensive PSTN access capacity as well as SIP to SIP interworking features that Enables the interconnection between all these elements. MTG1000 series trunk gateway with Strong design and high-efficient DSP processor ensures high-performance of the inter conversion of PCM voice signal and IP packets, even when the gateways are fully equipped. MTG1000B is interoperable with mainstream VoIP systems, and is compatible with PSTN network with digital trunk interfaces designed on our years' experiences on ISDN PRI / SS7 / R2 MFC.
