

GSM 3G/4G/ VoIP Gateway

Dinstar SIM Bank & SIM Cloud SIM Server

Dinstar SIMCloud & SIMBank is a centralized and remote management system, allows you to manage a great number of SIMs and different Dinstar GSM/3G/4G VoIP Gateways at different locations, saves most on management costs. SIMCloud is a device management, SIM card management, human behaviour simulation, real-time statistics, and Open Web-Service API system that could be installed on your dedicated server or in the cloud. SIMBank is a rack-mountable 1U box that can hold up to 128 SIM cards. The data from SIM cards is processed and transmitted via a secure protocol. All of this contributes to a secure and simple-to-implement solution.
