

GSM 3G/4G/ VoIP Gateway

[Dinstar UC2000-VE GSM/WCDMA/LTE VoIP Gateway](#)

Dinstar UC2000-VE is a 4 or 8 channels GSM/3G/4G VoIP Gateway in a compact field-proven hardware layout, used to easily transit between mobile and VoIP networks for the transmission of both voice and SMS. It is suitable for enterprises, multi-site organizations, call terminators, and areas with limited landlines, such as rural areas, to cut telephony costs and enable easy and efficient communications, thanks to integrated GSM/WCDMA/LTE connectivity and SIP protocol compatibility with mainstream VoIP platforms. It can be used independently, but it can also be used in conjunction with Dinstar SIMBank and SIM Cloud to manage remote SIMs.
