

OpenVox FXOS-200

FXOS-200 is a Dual-channel module, which builds 1 FXO and 1 FXS channel with failover capability. When PBX system is down, PSTN line connecting FXO will automatically switch to analog phone connecting with FXS. Because of the modular design, users can activate additional ports at any time with more FXS-200, FXO-200 or FXOS-200 modules. These modules pass all the call features with a standard analog telephone line will help.

Technical Specification

◆ Dimension:57.7mm*35mm

◆ Weight: 9g
