

Synway SIM Bank

SIMbank is Synway's newest security gadget, which works in conjunction with the SMG4000 series wireless gateway to provide network security. SIMbank allows the SMG4000 wireless to use SIM cards from a distance, allowing for interdependency and isolation between the Wireless gateway and remote SIM cards. Furthermore, SIMcloud centralized management system for unified management, as a conforming program in SIMbank, could administer SMG4000 wireless gateway and SIMbank to establish a low-to-high density wireless-IP calling system.

Features
